ENGINEERING PROJECTS

- **AI-Driven Grant Eligibility Evaluation System | Python, ML | [SOCIAL-IMPACT](#)**
 - Built an ML-based system to evaluate grant eligibility using Python and Machine Learning.
 - Automated proposal analysis and impact prediction through data-driven decision making.
 - **Website Performance Analyzer | Node.js, SEO | [WEBSITE ANALYZER](#)**
 - Developed a full-stack web application that analyzes website performance using the Google PageSpeed Insights API and Lighthouse.
 - Built REST API integration to retrieve real-time Performance, SEO, Accessibility, and Core Web Vitals metrics for any public website.
 - **Portfolio Website | React.js, Typescript, Tailwind CSS | [PORTFOLIO](#)**
 - Built a full-stack personal portfolio using React 19, TypeScript, and Tailwind CSS, with client-side routing across 4 pages using React Router.
 - Engineered a custom canvas-based particle network visualization in vanilla JavaScript/Canvas API to render skills as an interactive, animated node graph — no third-party animation library required.
-
